Annual Fire Safety Report 2021-2022

Higher Education Opportunity Act

Fire Safety

The Higher Education Opportunity Act (HEOA) requires that colleges and universities publish an annual fire safety report and maintain a fire reporting log. This website will be the primary location detailing the HEOA fire safety requirements and information.

Mandatory reporting requirements under the HEOA:

Disclosure of fire safety standards and measures report(s) that contains information about campus fire safety practices and standards, including:

1. The number of regular mandatory supervised fire drills.
2. The policies or rules on portable electrical appliances, smoking, and open flames (such as candles).
3. The procedures for evacuation.
4. The policies regarding fire safety education and training programs provided to students, faculty, and staff.
5. List of titles to whom students should report fires.
6. Plans for future improvements in fire safety, if determined necessary by the institution.

Statistics for each on-campus during the most recent calendar years for which data are available, concerning each of the following:

1. The number of fires and the cause of each fire.
2. The number of injuries related to each fire that results in treatment at a medical facility.
3. The number of deaths related to each fire.
4. The value of property damage caused by each fire.

Campus Fire Incident Reports

Year	Number Of incidents	Outcomes
2017-2018	0 Incidents	Not Applicable
2018-2019	0 Incidents	Not Applicable
2019-2020	0 Incidents	Not Applicable
2020-2021	0 Incidents	Not Applicable
2021-2022	0 Incidents	Not Applicable
2022-2023	0 Incidents	Not Applicable

Student Information

Every year college and university students experience a growing number of fire-related emergencies. There are several causes for these fires; however, most are due to a general lack of knowledge about fire safety and prevention.

All students should be familiar with the following:

- **Smoking is prohibited in all American Medical Academy properties effective July 1, 2014.**
- **All open flames are prohibited in or on campus property.**
- **The use of candles is prohibited in or on campus property.**
- **Halogen lamps are prohibited.**
- **The Institution has prohibited the use of all halogen floor lamps in or on campus property.**
- **Emergency exit doors within rooms/suites shall not be blocked on either side by furniture or obstruction of any kind.**
- **Any abuse of, or tampering with, fire alarm, smoke detectors, sprinkler system or extinguishers is strictly forbidden.**
- **Students must evacuate during all fire alarms.**
- **A delayed evacuation could result in you becoming trapped or seriously injured.**
- **Fire hazards should be routinely reported to your building manager, tutor, or proctor.**
- **Be knowledgeable of the locations of fire pull stations, primary and secondary emergency exits, and designated meeting locations outside.**
- **Importance of keeping fire doors closed.**
- **Unless protected by hold open devices that allow the door to close if the alarm goes off. Keep door closed. Fire doors separate you from the fire/smoke.**
- **Do not use elevators in a fire emergency.**
- **Prohibit the use of fireplaces in all student rooms and suites.**
- **Please refer to your Schools specific student handbook for additional or site-specific fire safety information.**

If You Discover a Fire: **R.A.C.E.**

RELOCATE

- If safe to do so, relocate people in immediate danger. Be aware of persons who may need assistance.

ALARM

- Pull the building fire alarm to alert others. Fire pull stations are typically near the fire exits and main exits.

CONFINE

- Close all doors as you exit your room or office, if safe to do so.

EVACUATE

- Evacuate the building. Do not use elevators. Report to your designated meeting site.

Fire Drills

As part of AMA’s fire awareness and fire prevention initiative for office, and commercial buildings, fire drills are conducted to review the following:

- Physical layout of the building
- Identify possible fire/safety hazards
- Observe the audible/visible alarm devices
- Observe the evacuation of the building
- Observe the behavior of building occupants
- The building’s emergency evacuation plan

Definitions

Term	Definition
Cause of Fire	The factor or factors that give rise to a fire. The causal factor may be, but is not limited to, the result of an intentional or unintentional action, mechanical failure, or act of nature.
Fire	Any instance of open flame or other burning in a place not intended to contain the burning or in an uncontrolled manner.

Term	Definition
Fire Drill	A supervised practice of a mandatory evacuation of a building for a fire.
Fire Safety System	<p>Any mechanism or system related to the detection of a fire, the warning resulting from a fire, or the control of a fire, including:</p> <ul style="list-style-type: none"> • Sprinkler or other fire extinguishing systems • Fire detection devices • Stand-alone smoke alarms • Devices that alert one to the presence of a fire, such as horns, bells, or strobe lights • Smoke-control and reduction mechanisms • Fire doors and walls that reduce the spread of a fire
Fire-Related Death	Any instance in which a person is killed as a result of a fire, including death resulting from a natural or accidental cause while involved in fire control, attempting rescue, or escaping from the dangers of a fire. Dies within one year of injuries sustained as a result of the fire.
Fire-Related Injury	Any instance in which a person is injured as a result of a fire, including an injury sustained from a natural or accidental cause while involved in fire control, attempting rescue, or escaping from the dangers of the fire. The term person may include students, faculty, staff, visitors, firefighters, or any other individuals.
Value of Property Damage	<p>The estimated value of the loss of the structure and contents, in terms of the cost of replacement in like kind and quantity, including:</p> <ul style="list-style-type: none"> • Contents damaged by fire • Related damages caused by smoke, water, and overhaul <p>Does not include indirect loss, such as business interruption</p>
